TECHNICAL PROJECT

Project 1 : Invoice Creator

<https://abdelhak45.github.io/Letter-project/>

By using HTML, CSS, and JavaScript that facilitate the creation of invoices. The system captures sender and receiver details along with corresponding phone numbers, date, and the letter content. This streamlined approach ensures efficient and organized invoice generation for seamless communication between parties.

Project 2 : Test Your Speed

<https://abdelhak45.github.io/Text-Game/>

By utilizing HTML, CSS, and JavaScript, this project centers around evaluating typing speed. The interface prompts users with diverse texts, gauging their capacity to input content rapidly and accurately. Through the integration of these front-end technologies, the project establishes an interactive platform for users to assess and refine their typing proficiency.

Project 3 : Pizza

<https://abdelhak45.github.io/pizza-project/>

Constructed a straightforward pizza-themed website using HTML, CSS, and JavaScript. The project features a clean and minimalist design, ensuring user-friendly navigation. Leveraging the capabilities of these languages, the site offers a seamless and visually appealing experience for users exploring pizza options.

Project 4 : Color Change

<https://abdelhak45.github.io/color-project-js/>

Crafted a dynamic project utilizing HTML, CSS, and JavaScript, enabling users to modify background, title, and paragraph colors effortlessly. The interactive interface not only facilitates color changes but also provides users with access to corresponding color codes. Additionally, the project offers the ability to extract code snippets for specific elements.
